- Good at Code Debugging

Project Impact

- Can own module

Projects

Red Cloud   *Team Size: 4*

We have successfully developed the RedCloud Web App, tailored to facilitate seamless communication management for our client. Within this project, I have primarily focused on the Super Admin module, which enables comprehensive CRUD operations for resellers within specific organizational structures. This functionality empowers organizational administrators to efficiently oversee reseller management and maintain organizational integrity. Leveraging meticulously crafted procedures, I've ensured the provision of detailed insights into reseller and organizational metrics, thereby enhancing the developmental efficacy

of the organization.

Skills: MS SQL
